Forecast for Monday 26 Jun 2023

Weather: A fine and bright start with plenty of sunshine. Cloud bubbling up by mid-morning but staying largely dry with some bright or sunny spells through the day, though with the odd isolated shower possible during morning. Cloud turning hazy at times with thicker higher level cloud then approaching from the west during the late evening. Feeling cooler than of late.

Chance of cloud-free hill tops above 600m: 80%

Low cloud and visibility: Patches of low cloud first thing with bases around 500 m, these soon rising and clearing with cloud bases then above summits. A chance of cloud lowering again late evening in the west. Very good to excellent visibilities throughout.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels are still high, especially in sunny breaks despite it feeling fresher, so adequate sun protection and hydration is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 27 Jun 2023

Weather: Cloud thickening from the west during the early hours to give a murky day with cloud across much of the mountains by mid-morning, accompanied with patches of rain and drizzle. Rain continuing on and off throughout much of the day, though could be persistent at times with some strong gusty winds.

Maximum wind: Westerly 20 mph gusting 30 mph

Chance of cloud-free hill tops 600m: 20%

Low cloud and visibility: Blanket of low cloud around 400-500 m across south and west, bases slightly higher further east of the park. Generally good or moderate visibilities, but dropping to poor in the low cloud and especially in drizzle or rain.

Temperature: **Valleys:** Plus 15 degrees Celsius rising to plus 20 degrees Celsius
At 600m: Plus 10 degrees Celsius rising to plus 14 degrees Celsius
Freezing level: Above summits.
